

# The Parsha Rhymes

## פרשת תרומה

Gold, silver and so much more were donated by everyone  
All of ישראל כלל wanted the זכות to donate to build the \_\_\_\_\_<sup>1</sup>

First, how to build the ארון we learn all about  
It was made out of gold – both inside and \_\_\_\_\_<sup>2</sup>

There was also gold on top that went all around  
Where they put on the ארון a small golden \_\_\_\_\_<sup>3</sup>

On each side of the ארון there were rings that had holes  
And inside of the rings they put the ארון's \_\_\_\_\_<sup>4</sup>

And while only to carry the ארון, the בדים were used  
But there is a הלכה that from the ארון, the בדים can never be \_\_\_\_\_<sup>5</sup>

You would notice something interesting, if you saw the ארון in a photograph  
The measurements of the width, length and height, all end in a \_\_\_\_\_<sup>6</sup>

On top of the ארון were 2 כרובים with wings stretched out above  
And they were facing each other to show how much us ה' does \_\_\_\_\_<sup>7</sup>

But when ישראל כלל don't keep ה' מצות, on that terrible day -  
The כרובים from each other, would be miraculously turn \_\_\_\_\_<sup>8</sup>

Let's learn about the שלחן - 2 אמות high it stood  
And here the inside was made out of cedar \_\_\_\_\_<sup>9</sup>

It was covered in gold, had a crown and had בדים too  
And on it was להם הפנים that always seemed like it was \_\_\_\_\_<sup>10</sup>

How to build the מנורה – Moshe did inquire  
ה' told him to take a piece of gold and throw it into a \_\_\_\_\_<sup>11</sup>

Out came a beautiful מנורה – with 7 branches that above did tower  
And on each branch were 3 cups, a knob and a \_\_\_\_\_<sup>12</sup>

The משכן was covered with curtains that were really beautiful  
Made from animal skins, goat hair and linen and \_\_\_\_\_<sup>13</sup>

For the walls of the משכן, standing tall were the קרשים  
And each one had under it – two \_\_\_\_\_<sup>14</sup>

In order to hold the קרשים together בריחים were applied  
And there was also a בריח that went through it in the \_\_\_\_\_<sup>15</sup>

While the קרשים and בריחים were made out of עצי שיטים so bold  
All of the wood was covered over with pure \_\_\_\_\_<sup>16</sup>

There was a beautiful פרוכת to separate the different sections  
With the שלחן and מנורה in the קודש and the ארון in the \_\_\_\_\_<sup>17</sup>

The מזבח made out of wood – 5 אמות each side a perfect square  
This one wasn't kept in the משכן rather it was in the \_\_\_\_\_<sup>18</sup>

Around it all, was the חצר which was also made perfectly proper  
With עמודים of silver and אדנים made of \_\_\_\_\_<sup>19</sup>

They used the best materials to build the משכן with חכמה and בינה  
So it would be a worthy place for Hashem to rest his \_\_\_\_\_<sup>20</sup>
